Shamshabad, Hyderabad – 501218

DEPARTMENT OF FRESHMAN ENGINEERING

CIRCULAR

F.No. VCE/H&S/100(4.5.3)/2018-2019/OCT/002

Date: 12/10/2018

All the students of I B.Tech I Semester ECE/EEE/CIVIL are hereby informed to attend Engineering Exploration Workshop on Arduino – A step-by-step Introduction to the Arduino Electronic Circuits and Programming scheduled during 23 October 2018 to 16 November 2018 by Embedded RF Technologies, Hyderabad.

Date(s)	Target Group	
23-27, October 2018	ECE - A	Prof.S.Rajendar Prof.Y.Pandurangaiah
25-29 October 2018	ECE - B	Mr.M.Nagarjuna Prof.S.Rajendar
25- 29, October 2018	ECE - C	Mr.J.Krishna Chaitanya Ms.C.Padmini
31 Oct - 05 Nov 2018	ECE - D	Mr.P.Srikanth Prof.S.Rajendar
2-7, November 2018	EEE - A	Dr.M.Narayana Mr.M.Gopi Krishna
12- 16, November 2018	EEE - B	Dr.M.Narayana Mr.P.Srikanth
12-16, November 2018	CIVIL	Ms.M.Srilatha Prof.S.Rajendar

The workshop covers

1. Contemporary Global, National and Local Issues in Social, Economic, Political and Ecological Context.
2. Theory of Change
3. Design Thinking for Social Innovation
4. Development of Solutions, Business Ideas and Opportunities

The outcomes of this work are

1. To develop awareness on social issues
2. To identify the requirements for harmonious society through the rule of law and morality to co-exist.
3. To provide a framework for students to think about long term social issues/changes.
4. To develop solutions, prototype business ideas and identify business opportunities.

Objectives:

LabVIEW software is ideal for any measurement or control system, and the heart of the NI design platform. Integrating all the tools that engineers and scientists need to build a wide range of applications in dramatically less time, LabVIEW is a development environment for problem solving, accelerated productivity, and continual innovation.

LabVIEW is a graphical programming platform that helps engineers scale from design to test and from small to large systems. It offers unprecedented integration with existing legacy software, IP, and hardware while capitalizing on the latest computing technologies.

LabVIEW provides tools to solve today's problems—and the capacity for future innovation—faster and more effectively.

Workshop on National Instruments LabVIEW – CORE 1 & 2 (CLAD) Program will fulfill the following objectives:

- Learn how to develop basic applications in the LabVIEW graphical programming environment.
- Design, implement, and distribute stand-alone applications using LabVIEW.
- Learn the skills needed to create scalable, readable, and maintainable applications.

Keeping in mind, the importance of research in frontier areas like Virtual Instrumentation, ECE Dept., Vardhaman College of Engineering in association with National Instruments & VI Solutions is organizing a workshop on "CLAD Certification Training in Virtual Instrumentation"

Resource persons:

Application Engineer in the concerned field from VI Solutions, Bangalore is invited to deliver lectures in the program.

Eligibility:

The programme is open to the teachers of engineering colleges from Electronics and communication Engineering, Electrical Engineering, Information Technology, and other allied technical disciplines, Scholars in Telangana, Andhra Pradesh, Karnataka states and Goa. Industry personnel working in the concerned/allied discipline can also attend.

How to apply:

The filled in Registration form duly signed by appropriate authorities and scanned copy of Registration form should reach the coordinator through e-mail.

About VI SOLUTIONS :

VI Solutions was founded by a pool of live wire professionals having several years of combined technical and corporate expertise in providing high quality, cost-effective and complete end-to-end solutions to its valued customers. All our team members are highly qualified in their respective fields and have years of industrial experience behind them. It is an automation Company and a pioneer in providing Systems, Solutions and Products for a wide range of industries and applications.

About VCE:

The Vardhaman College of Engineering was established in 1999. The college holds UGC autonomous & affiliated to JNTUH. It offers B.Tech. programs in six branches of Engineering, viz., Civil, EEE, ME, ECE, CSE & IT., and PG courses in MBA, M. Tech(DECS), M. Tech(ES), M. Tech (CSE), M. Tech (PEED), M. Tech (SE) and M. Tech (ED). All the eligible UG engineering programmes have been accredited by National Board of Accreditation (NBA) of AICTE, New Delhi and by NAAC. The College is recognized with Centre for Potential of Excellence by UGC. The college is also accredited by TCS.

Accommodation:

For outside participants accommodation will be provided on prior request. No TA will be paid for the participants.

Important dates:

Last date for submission of application: 8.03.2018
Selection intimation will be by email: 10.03.2018

Duration of Program:
12-22 March 2018

Department of ECE:

The Department is headed by Prof. Y. Pandurangaiah having vast teaching experience and supported by highly qualified faculty- 10 Professors, 19 Associate Professors and 34 Assistant Professors. The department has established centers of excellence in Cadence VLSI Design, NI LabVIEW Academy, Signal processing and RF and Microwave Simulation.

Major Course Contents:

The workshop content is divided along the lines of following projects and learning outcomes.

- Introduction to LabVIEW
- Creating, Editing, and Debugging a VI, SubVI
- Loops, Charts, Strings, Arrays, Graphs and Clusters
- Case and Sequence Structures, Strings and File I/O
- VI Customization, File I/Os
- Planning LabVIEW Applications
- Introduction to PC based data acquisition.
- myDAQ basics- IO details, specifications and its software requirement.
- Introduction to NI MAX and hardware detection in MAX, Hands-on with Test Panels (AI, AO, DIO and Counter).
- Hands-on with Temperature sensor, Signal generation through AO, Digital IO's- IR sensor based counter including logging using LabVIEW.
- Interfacing motor driver and motor using myDAQ Digital IO and Counter, Direction and speed control of DC motor.
- Audio signal acquisition and importance of sampling rate.
- Introduction and Programmatic to low level DAQ programming- DAQmxVI's.
- NI myRIO introduction.
- Hands-on myRIO on-board device ACC, LED's and Push button, AI and DI.
- Hands-on sensor value based actuator control IR sensor and DC motor, Embedded programming (Deploying EXE into myRIO).
- Configuring Wi-Fi network using myRIO and passing the sensor data from one myRIO to another.
- Hands-on Heart rate and Level sensor with NI myRIO in Wi-Fi mode, PWM and Counter channels.
- Hands-on Quadrature Encoder using NI myRIO counter terminal and Rotary Encoder.
- Introduction to myRIO protocols: UART, I2C and SPI.
- Hands-on UART protocol: Loop back and PmodLCD, I2C and SPI, I2C protocol with help of GYROSCOPE and pressure sensor, SPI protocol with PmodALS, PmodLCD.
- Hands-on FPGA programming on myRIO on-board devices, Analog channels acquisition in FPGA mode.
- DMA FIFO configuration and FPGA I/O raw value conversion of Analog acquisition.
- Hands-on Mobile App with myRIO (NI Data Dashboard for LabVIEW) and Text to Speech.
- GSM and GPS Demo.

Vardhaman College of Engineering was established in 1999 with an endeavour to impart high quality Technical Education and innovative research in the fields of Engineering technologies, with emphasis on industry oriented programs for development of students as well as faculty. Vardhaman College of Engineering is affiliated to Jawaharlal Nehru Technological University (JNTU), Hyderabad, and is approved by the All India Council for Technical Education (AICTE), New Delhi.

The prime objective of Vardhaman College of Engineering is to update and modernize the quality of professional education. Its aim is to employ innovative teaching methods which carry an emphasis on fast changing technological trends. This is to integrate classroom learning with actual work experience in the industry concerned or in a related professional field. In the course of continued march towards excellence the college was credited with the status of an Autonomous College by JGC and accredited by NAAC with 'A' Grade.

DEPARTMENT

The department of Electrical and Electronics Engineering was established in 2002 and is accredited by National Board of Accreditation (NBA), AICTE. The department has competitive faculty members from prestigious institutions in specializations like Electrical Power Systems, Control systems, Power Electronics and Instrumentations. The department is also offering M. Tech. (Power Electronics and Electric Drives) from the academic year 2008-2009 with an intake of 18 and is affiliated to Jawaharlal Nehru Technological university.

Objective of the department is to train and educate undergraduate engineering with academic excellence and to develop the student as a competent and responsible citizen with positive attitude, good character, self-confidence and leadership qualities and to keep pace with the rapidly growing technology in the Electrical and Electronics engineering field. The department has well equipped laboratories to meet the demands of present day international Scenario.

The department organizes National level conferences/ workshops/ seminars frequently for the benefit of faculty and students of various engineering college for meeting the industry standards.

Objectives of the workshop

This workshop on Antenna & RF Component modeling using HFSS will incorporate theory into practice and will enable the participants to gain insights into the design, development and testing of various RF components and circuits that are being implemented as MINI and MAJOR Projects..

The workshop on HFSS will fulfill the following objectives:

- Explain the Basics of HFSS Software
- Understand existing and emerging Research Topics for implementation of projects
- Design of various types of Antennas and RF components.
- Describe and understand a broad spectrum of Filters, Power dividers etc. and their types
- Expertise in HFSS Tool for designing various RF components, SAR, EMI Analysis, optimization, tuning techniques etc.

Keeping in mind, the importance of research in frontier areas like RF & Microwaves, ECE Dept., Vardhaman College of Engineering in association with ARK Info Solutions Bangalore is organizing a workshop on RF Circuit Design using Ansys-HFSS.

Registration Details

- ❖ No Registration Fee for the Participants.
- ❖ Limited number of Participants (35 - 40) will be accommodated on first-cum-first served basis.
- ❖ Lunch, Tea and Snacks will be provided.

CIRCULAR

All the faculty members & students of RF-HFSS group of ECE department are hereby informed that there will be a One Week work shop on "Antenna & RF Components Modeling using HFSS" during the period 21-07-2016 to 26-07-2016. All the faculty & students concerned are advised to attend the above workshop and should upgrade their technical skills.

Venue: RF-HFSS Lab

Time: 10 AM - 4.30 PM

Head, ECE

Objective of the FDP

LabVIEW software is ideal for any measurement or control system, and the heart of the NI design platform. Integrating all the tools that engineers and scientists need to build a wide range of applications in dramatically less time, LabVIEW is a development environment for problem solving, accelerated productivity, and continual innovation.

LabVIEW is a graphical programming platform that helps engineers scale from design to test and from small to large systems. It offers unprecedented integration with existing legacy software, IP, and hardware while capitalizing on the latest computing technologies.

LabVIEW provides tools to solve today's problems—and the capacity for future innovation—faster and more effectively.

Workshop on National Instruments LabVIEW – CORE 1 & 2 (CLAD) Program will fulfill the following objectives:

- ❖ Learn how to develop basic applications in the LabVIEW graphical programming environment.
- ❖ Design, implement, and distribute stand-alone applications using LabVIEW.
- ❖ Learn the skills needed to create scalable, readable, and maintainable applications.

Keeping in mind, the importance of research in frontier areas like Virtual Instrumentation, ECE Dept., Vardhaman College of Engineering in association with National Instruments & VI Solutions is organizing a workshop on National Instruments LabVIEW – CORE 1 & 2 (CLAD) Program, NIL – 2016.

Registration Details

- ❖ No Registration Fee for the Participants.
- ❖ Limited number of Participants (35 - 40) will be accommodated on first-cum-first served basis.
- ❖ Lunch, Tea and Snacks will be provided.

Important Dates

Last date for Registration : 03/02/2016
Date of Acceptance Intimation : 05/02/2016

Objectives of the workshop

This workshop on RF Circuit Design training will incorporate theory into practice and will enable the participants to gain insights into the design, development and testing of various RF components and circuits that are used in our day to day applications. These include that transmits or receives a radio wave : cellular networks such as GSM, CDMA, UMTS.HSPA+, LTE, LTE-Advanced, Wi-Fi, Bluetooth, Zig bee, Wi-MAX, Satellite Communications, VSAT, two-way radio, and Public Safety Solutions.

The workshop on HFSS will fulfill the following objectives:

- Explain the Basics of RF
- Understand existing and emerging standards for RF principles
- Design of various types of Antennas and RF components.
- Describe and understand a broad spectrum of Filters, Power dividers etc. and their types
- Expertise in HFSS Tool for designing various RF components, SAR, EMI Analysis, optimization, tuning techniques etc.

Keeping in mind, the importance of research in frontier areas like RF & Microwaves, ECE Dept., Vardhaman College of Engineering in association with ARK Info Solutions Bangalore is organizing a workshop on RF Circuit Design using Ansys-HFSS.

Registration Details

- ❖ No Registration Fee for the Participants.
- ❖ Limited number of Participants (35 - 40) will be accommodated on first-cum-first served basis.
