YAYIN AI LABS

Travelling has been always a go-to activity more than just a hobby for our team. I often follow blogs and travel stories of people who experience life, nature, and travel like a local. Most travel planning websites follow a similar pattern: where mainstream travelers' search for/suggested famous monuments or locations and book a hotel/Airbnb around it, later plan a visit with friends or family. The proposed platform would be like a social network with inputs from travel bloggers, professional travelers, and local users
